

# TIMBRON

Timbron interior mouldings are composed of 90% recycled plastic (75% post consumer, 15% pre consumer) and minimize the consumption of natural resources. Timbron products are durable, waterproof, mold and mildew resistant, termite proof, zero VOC, and eco-friendly. They can be cut, nailed, glued, sanded and painted "just like wood", and are a great product to use in the wet areas of a home. Use it with confidence in kitchens, bathrooms, laundry rooms, and basements.

**Base-Vertical Grain**
